Steel

Clear Coated
Stainless Steel

Tinted
Stainless Steel
"Black Smoke"

Let Nickeloid help you...

- ▶ optimize the look
- ▶ lose the headaches

If you like the stainless steel look but need an alternative to improve cost or marketability... Nickeloid is a one stop shop.

Nickeloid has evolved, over its 100+ year history into perhaps the most diverse supplier of decorative metals. Our stainless steel alternatives really show our wide product offering.

▶ Satin Nickel Steel

Nickeloid plates nickel onto a steel substrate that is then brushed to a satin finish. An available anti-fingerprint top coat provides a protective layer and may be tinted to match particular customer requirements.

▶ Laminol®

Nickeloid is one of the most advanced producers of laminated metal. We apply, under heat and pressure, a vinyl film to a steel or aluminum substrate resulting in several high performance products that closely replicates stainless steel.

▶ Clear & Tinted Coated Stainless Steel - "Black Smoke"

In addition to the faux stainless steel items, American Nickeloid Company also offers clear and tinted coatings on stainless steel.

PROTECTIVE COATINGS

▶ Bakekote®

Bakekote is a transparent or tinted baked-on epoxy coating that protects the beautiful finish without discoloring, chipping, or peeling under most fabricating conditions.

▶ Mar-Not®

For severe handling and fabrication situations, we recommend the use of Mar-Not®, a removable plastic or paper protective. Mar-Not® provides protection and added lubrication during fabrication, yet peels off easily when the job is done.

SPECIFICATIONS

▶ Satin Nickel Steel

Gauges .008" to .107"
Width 1/4" to 36"

▶ Laminol® Clear & Tinted Coated Stainless Steel - "Black Smoke"

Steel Gauges .015" to .0598"
Aluminum Gauges .016" to .090"
Width 1/4" to 60"

Note:

Some gauges are not available in all widths. Please contact American Nickeloid with your specific requirements.

▶ The way you need it

Nickeloid can provide your material the way you need it. Full coils, coils slit to specific widths, or cut sheets.
